Adhitya Kiran Kanakaraj

Nice, France | +33 7 46 37 09 30 | adhityakiran10@gmail.com | LinkedIn | GitHub

Summary

Data Science Master's student at EURECOM with a solid fundamental background in Artificial Intelligence and Data Science. Passionate about turning data into practical insights, with hands-on experience in machine learning, AI, and data-driven projects.

Education

EURECOM — France
Master of Science in Computer Science (Specialisation in Data Science) — *Sept 2025 – Present*

Panimalar Institute of Technology — India
B.Tech in Artificial Intelligence and Data Science — *Oct 2021 – Jun 2025*

Technical Skills

Programming & Core: Python, SQL, Bash
ML/DL Frameworks: PyTorch, NumPy, Pandas, Scikit-learn, Hugging Face Transformers
AI/NLP Expertise: Large Language Models (LLMs), Fine-tuning, Natural Language Processing (NLP), Knowledge Graphs
Data Engineering & Databases: ETL Pipelines, Distributed Processing, PostgreSQL, Data Integrity
BI & Cloud Platforms: Power BI, Tableau, Azure (AZ-900), Google Cloud Platform (GCP)

Internships

UNIQ Technologies — Chennai, India
AI Intern — *Nov 2024 – Dec 2024*
- Applied AI algorithms and performed data analysis to enhance system efficiency and workflow automation.
- Collaborated closely with a five-member team to build and test real-world AI solutions using Python.

TRIOs Technologies — Chennai, India
Data Science Intern — *Jul 2023 – Aug 2023*
- Assisted in data pre-processing pipelines and implemented foundational deep learning models under supervision.
- Conducted exploratory data analysis using Pandas and Matplotlib to extract key insights for ongoing projects.

AI & Data Science Projects

Lightweight RAG Pipeline for Edge Environment | *Python, LLMs, RAG* — *Feb 2026 – Present*
- Developed a custom, resource-efficient RAG prototype to establish performance baselines for edge deployments.
- Evaluated system trade-offs across chunking strategies, embedding models, and simulated hardware constraints.

Enhanced Sign Language Translation Using Vision Transformers | *Python, ViT, TrOCRFinal Year Project*
- Developed a real-time, bidirectional sign language translation system enabling seamless communication.
- Implemented Vision Transformers (ViT) for gesture extraction and TrOCR to convert movements into text.

Publications

Decentralizing AI Computing: A Study with IPFS and Public P2P Networks — *Mar 2024*
ICONIC Conference, PEC in Collaboration with IEEE — *Chennai, India*
- Designed a decentralized AI framework utilizing peer-to-peer nodes and IPFS to enhance data security, minimize data breach risks, and eliminate central bottlenecks .
- Demonstrated through experimental results that distributed architectures achieve comparable performance to centralized models while offering significant advantages in scalability, cost, and reliability.

Certifications

- DELF A2 (Jun 2025)
- IBM SkillsBuild Cloud Fundamentals (Apr 2024)
- Nasscom Cyber Security and Design (Jun 2024)
- Cisco Networking Essentials (jun 2024)
